

Fulcrum Shipping – Admin User Guide

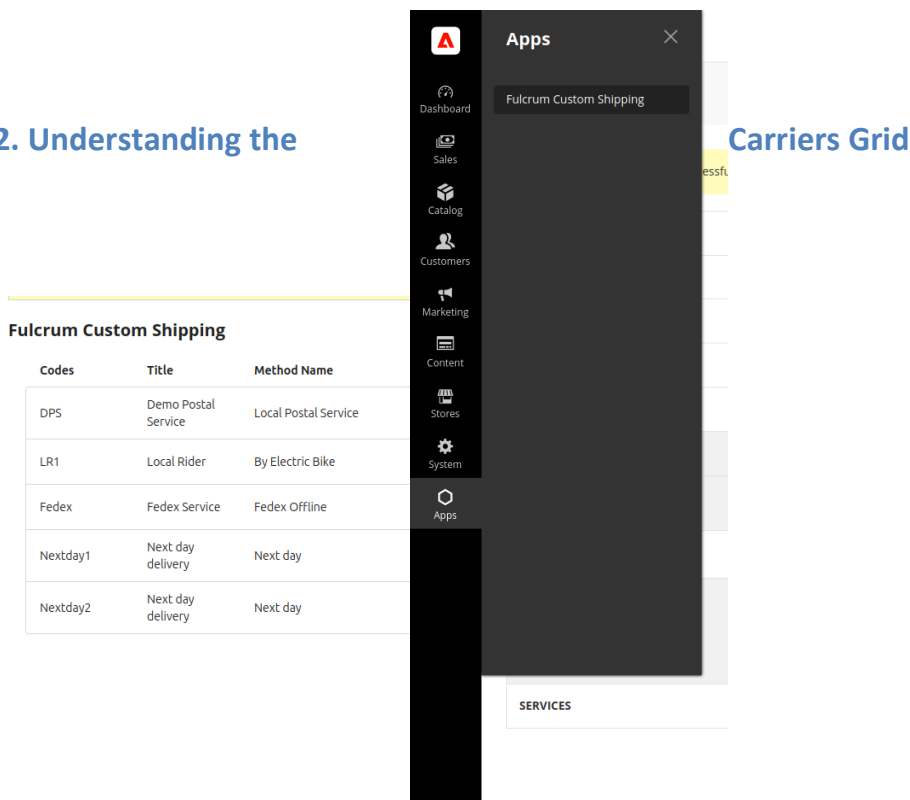

This guide explains how to configure and manage Fulcrum Shipping carriers in the Adobe Commerce Admin. It is intended for store administrators who need to set up and maintain shipping methods.

1. Accessing Fulcrum Shipping in Magento Admin

To access the Fulcrum Shipping configuration:

1. Log in to the Adobe Commerce Admin.
2. Navigate to:
Apps > Fulcrum Shipping
3. The Fulcrum Shipping Configuration page will open, displaying the list of carriers.

2. Understanding the

The screenshot shows the Adobe Commerce Admin interface. On the left, there is a sidebar with navigation options: Dashboard, Sales, Catalog, Customers, Marketing, Content, Stores, System, and Apps. The 'Apps' option is selected, and a dropdown menu is open, showing 'Fulcrum Custom Shipping' as the selected item. The main content area displays the 'Fulcrum Custom Shipping' configuration page. It features a table with the following data:

Codes	Title	Method Name
DPS	Demo Postal Service	Local Postal Service
LR1	Local Rider	By Electric Bike
Fedex	Fedex Service	Fedex Offline
Nextday1	Next day delivery	Next day
Nextday2	Next day delivery	Next day

Below the table, there is a section labeled 'SERVICES'.

The Fulcrum Custom Shipping grid lists all configured carriers and their details:

- Code – Internal identifier of the carrier.

- Title – Displayed name of the carrier in the checkout.
- Method Name – Optional internal name for the shipping method.
- Stores – Store views where the carrier is available.
- Sort Order – Position of the carrier relative to other shipping methods.
- Active – Indicates whether the carrier is enabled.
- Price – Base rate or value used in calculation.
- Minimum/Maximum – Limits for applying to the carrier.
- Actions – Options to Edit or Delete the carrier.

3. Adding a New Carrier

1. On the Fulcrum Custom Shipping page, click Add Carrier.
2. The Add Carrier form will open.

Form Fields:

- Code * – Unique identifier for the carrier.
- Title * – Name shown to customers at checkout.
- Method Name – Optional descriptive name for internal use.
- Stores – Select one or more store views.
- Value – Base rate or price for this carrier.
- Minimum / Maximum – Thresholds for applying this carrier.
- Sort Order – Position of this method in checkout options.
- Price per Item – Check to apply the rate per item rather than per order.
- Active – Enable or disable the carrier.
- Tracking Available – Enable if this carrier provides tracking.
- Shipping Labels Available – Enable if this carrier supports label generation.
- Customer Groups – Select one or more customer groups. At least one must be selected.

4. Editing a Carrier

1. Locate the carrier in the Fulcrum Custom Shipping grid.
2. Click Edit in the Actions column.
3. Modify the desired fields.
4. Click Save to update the carrier.

Tip: Use Active to temporarily disable a carrier without deleting it.

5. Deleting a Carrier

1. Locate the carrier in the Fulcrum Custom Shipping grid.
2. Click Del in the Actions column.
3. Confirm the deletion. The carrier will be permanently removed.

6. Testing in the Storefront Checkout

Once carriers are configured:

1. Go to the storefront.
2. Add a product to the cart.
3. Proceed to the Shipping step in checkout.
4. Enter a shipping address applicable to the configured stores and groups.
5. The Fulcrum Shipping methods should appear under Shipping options, showing:

- Configured Title.
- Calculated Price.
- Applied Sort Order.

7. Best Practices

- Use clear and descriptive Titles for carriers so customers understand the shipping option.
- Test changes after saving to ensure methods display correctly at checkout.
- Use Customer Groups and Stores to restrict carriers to relevant users and markets.
- Keep the Sort Order logical to avoid confusing customers with method positioning.
